About H&K Fire

Dedicated to Protecting People, Property and Businesses

Who We Are

We are a trusted fire safety company committed to delivering high-quality solutions tailored to the unique needs of our clients. From new builds to existing facilities, we work across a wide range of industries, ensuring every project meets the latest fire safety regulations and standards.

HK Fire Ltd proudly operates across the entire UK and the Channel Islands, providing nationwide coverage with the same high standards of service and expertise wherever you are based.

Why Choose Us

- Comprehensive fire safety expertise
- Reliable, fully certified solutions
- Dedicated to compliance and peace of mind
- Professional service tailored to your needs

Our Promise

At HK Fire Ltd, your safety is our priority. Whether it's safeguarding a single property or managing fire safety across multiple sites, we provide robust, cost-effective solutions you can depend on.

Our Services

High-quality solutions meeting fire safety regulations & standards

Fire Risk Assessment

Fire Risk Assessments that help businesses, landlords, and property managers meet legal obligations and ensure the safety of their premises. Our expert team is here to identify risks and implement effective solutions for commercial enterprise, residential properties, public facilities.

Fire Risk Assessment External Walls FRAEWs

In accordance with the latest guidance, including PAS 9980:2022. Our qualified assessors deliver clear, evidence-based evaluations of cladding systems and external wall constructions to support fire safety and regulatory compliance for residential and mixed-use buildings.

Passive Fire Protection

Passive Fire Protection (PFP) Surveys help ensure your building complies with fire safety regulations and keeps occupants safe in the event of a fire. Our surveys identify defects, gaps, and non-compliant installations that could compromise compartmentation and fire resistance.

Our Services

High-quality solutions meeting fire safety regulations & standards

Fire Stopping

Fully compliant Fire Stopping services to protect lives, property, and operations by preventing the spread of fire and smoke through service penetrations and building compartments. Our certified installers ensure every penetration is properly to meet current fire safety regulations.

Cavity Barriers

Cavity Barrier installation, inspection, and remediation services to help ensure your building's fire safety system performs as designed. Cavity barriers are a critical element of passive fire protection – yet they are often overlooked or incorrectly installed.

Cavity Barriers

Linear Gap Seals

Specialists in the installation, inspection, and maintenance of Linear Gap Seals – a vital element of passive fire protection. These seals are designed to prevent fire and smoke from spreading through construction gaps, helping to maintain compartmentation and ensure regulatory compliance.

Linear Gap Seals

Our Services

High-quality solutions meeting fire safety regulations & standards

Intumescent Spraying

Intumescent coatings are a highly effective and unobtrusive way to achieve up to 120 minutes of fire resistance, ensuring your project meets all legal requirements and safety standards without compromising design or aesthetics.

Fire Curtains

Design, supply & installation of certified Fire Curtains to protect people, property, and critical escape routes during a fire. Fire curtains are a vital part of modern passive fire protection systems – offering discreet yet powerful barriers that deploy automatically to compartmentalise smoke & fire.

Fire Extinguisher Servicing

Reliable, fully certified Fire Extinguisher Servicing and Maintenance to keep your premises safe and compliant. As a legal requirement under UK fire safety regulations, fire extinguishers must be regularly maintained to ensure they will function correctly in the event of a fire.

Our Services

High-quality solutions meeting fire safety regulations & standards

Fire Door Surveys

Specialise in comprehensive Fire Door Surveys and Remediation, ensuring every fire door in your building is inspected, tested, and brought up to full compliance with fire safety regulations. Fire doors can be the difference between containment and catastrophe in the event of a fire.

Signage

Expert Fire Safety Signage supply and installation services, helping you comply with legal requirements while ensuring the safety of building occupants in the event of an emergency. Ensuring your signage is correct, visible, and fully compliant with current legislation and best practice.

Additional Services

- Wet & Dry Risers
- Emergency Lighting
- Fire Alarms
- Fire Dampers
- Automatic Opening Vents (AOVs)
- Installation
- Testing
- Servicing & Maintenance
- Emergency Call-Outs

FAQs

Take a look at some of our most Frequently Asked Questions

What's the difference between passive and active fire protection?

Passive fire protection (PFP) includes structural measures designed to contain or slow the spread of fire and smoke, such as fire-rated walls, floors, doors, and firestopping. Active fire protection (AFP) involves systems that require a response to operate—like sprinklers, fire alarms, smoke detectors, and suppression systems.

Do I need both passive and active fire protection in my building?

Yes. Both systems complement each other. Passive systems help compartmentalize fires, while active systems detect and suppress them. Together, they provide comprehensive fire safety and compliance with local codes.

How do I know if my building's passive fire protection is up to code?

We offer fire risk assessments and passive fire surveys. Our certified inspectors will evaluate your current protection and provide a detailed report with recommendations to meet regulatory standards.

Are your services compliant with local fire safety regulations?

Yes. We ensure all installations and maintenance meet or exceed local and national fire safety codes, including NFPA, IFC, and other relevant standards. Our team stays updated on regulatory changes to keep your building safe and compliant.

Can you help with fire safety planning and training?

Absolutely! We offer fire safety audits, emergency evacuation planning, and staff training sessions to prepare your team for fire emergencies.

How do I get a quote or schedule a consultation?

Simply reach out via our website contact form, call us directly, or email us. We'll arrange a site visit and provide a detailed quote tailored to your building's specific fire protection needs.
